**Artificial Reproductions:
A low maintenance alternative.**

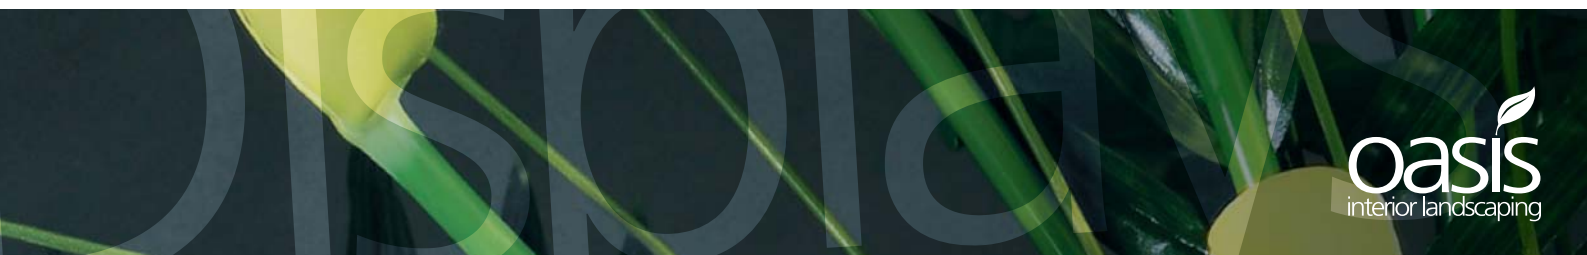

The progress made in the design and production of these top quality plant displays has resulted in almost unbelievable realism. Each Oasis artificial plant offered is a replica of its living counterpart. A complete range is offered from desk top through to floor standing displays. Perfectly simulated specimen trees with natural wood stems are supplied to varying heights.

All the foliage for interior use, within this brochure, can be treated with flame retardant if required.

Apart from the planters shown, there is an extensive range available with a variety of colours.

For any further details or requirements please contact our sales office on 01270 750 574.
